PROFILE

Aspiring Full Stack Developer focused on building responsive web applications with JavaScript, React, Next.js, and TypeScript. Enjoys learning by building projects, working with APIs, improving UI responsiveness, and understanding how frontend and backend pieces work together.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, DaisyUI

Backend & Data: Node.js fundamentals, Express.js, REST APIs, MongoDB fundamentals, JSON

Tools: Git, GitHub, VS Code, npm, Vercel

SELECTED PROJECTS

BazarDor — Market Price Tracking Web App

A responsive market-price tracking app for everyday essentials with category browsing, price sorting, product details, price-change highlights, and supported sign-in methods. Built with Next.js, Tailwind CSS, Better Auth, and MongoDB.
Live: bazar-dor-web-phi.vercel.app | Code: GitHub repository

Hero App — App Discovery Web App

A responsive app discovery experience to browse trending apps, view details, install/uninstall apps, prevent duplicate installations, and show toast notifications. Uses JSON data and React Context API.
Live: hero-app-steel.vercel.app | Code: GitHub repository

FitLog — Fitness Web App

A fitness-focused web project built with Next.js, presenting a gym/fitness experience through a responsive interface.
Live: gym-app-zzpd.vercel.app | Code: GitHub repository

LEARNING & DEVELOPMENT

Practicing component-based development, React state and Context API, data fetching, API integration, authentication flows, responsive design, CRUD concepts, and deployment through hands-on projects.

Resume draft based on currently available project details.
